University of Sindh, Jamshoro – BS, Computer Science

Jan'18 – Jan'22

BISE Hyderabad – Intermediate

2014 – 2016

BISE Hyderabad – Matriculation
2012 – 2014

WORK EXPERIENCE/INTERNSHIPS

Institute Of Information & Technology – Web Developer Intern:

- Worked as an intern within the web development team, providing assistance with both frontend and backend tasks.
- Collaborated with the team in designing and implementing user interfaces using HTML, CSS, and PHP to enhance website aesthetics and user experience.
- Gained hands-on experience in utilizing MySQL database for backend development, ensuring efficient data storage and retrieval.
- Developed technical skills in frontend and backend web development, further enhancing proficiency in coding, debugging, and problem-solving.
- Improved soft skills, such as teamwork, communication, and time management, by actively engaging with the team and meeting industry standards.
- Successfully contributed to the completion of various web development projects, acquiring practical knowledge and industry insights.

ClickySoft – Junior Web Developer:

- Designed and developed websites utilizing HTML, CSS, and PHP to create visually appealing and user-friendly interfaces.
- Implemented user interfaces and user experiences (UI/UX) to enhance website usability and user engagement.
- Built server-side logic using PHP and integrated database MySQL, to ensure seamless functionality and data management.
- Developed web applications with interactive features, such as forms, real-time updates, and dynamic content, to enhance user experience.
- Conducted thorough testing and debugging of code to ensure high-quality, error-free web applications and resolved any issues that arose during the development process.

PERSONAL PROJECTS

- **The Loan Management System Website** is a project built with HTML, CSS, Bootstrap, PHP, and MySQL. It enables users to manage loans through features like application submission, approval, repayment tracking, and reporting. The system ensures user authentication, offers responsive design, and utilizes a MySQL database for secure data storage and retrieval. It aims to streamline loan management processes and enhance efficiency for borrowers and lenders.
- **The Khaoo Piyoo Restaurant Website** is a project catering to a restaurant's needs, offering online food ordering capabilities. This website allows customers to browse the menu, place orders, and make payments online. It includes features such as order tracking, customer reviews, and a responsive design for a smooth user experience. The project aims to bolster the restaurant's online presence and streamline the food ordering process for customers.
- **Institute Of Information & Technology (Official website).**
  Developed and deployed successfully official website of Institute of Information Technology both front end and backend using HTML, CSS, JS, PHP and MySQL. It is multi pages site with different modern features like chat, online admission, and contact.
